

The [Alma Mater Studiorum – University of Bologna Faculty of Agriculture](#) (Italy) together with the [Technical University of Munich](#) (TUM, Weihenstephan, Germany) and the [University of Natural Resources and Applied Life Sciences, Vienna](#) (BOKU, Austria) announces the

## International Master in Horticultural Sciences (IMaHS)

This Master's Course is a fantastic opportunity for third country students to join an exciting educational environment. Twenty student fellowships (21,000 € per year) will be available for the most promising third country applicants.

The strong integration among three European leading Universities will provide a wide range of complementary expertises contributing to create a holistic preparation for the future graduates. **The teaching staff will include 28 EU professors and 5 third-country scholars per year.**

By the agreement in force between the University of Bologna and the Universities in Munich and Vienna, students, beyond obtaining the Italian degree, Laurea Specialistica in Ortofrutticoltura Internazionale, will also receive the corresponding degree from the Partner University in which he/she will have acquired the 30 credits required. These are the Master of Science of the Technical University of Munich, and the Diplom Ingenieur of the University of Natural Resources and Applied Life Sciences, Vienna.

The course will be open to 25 EU Students and 20 third-country students. All the details about the Master's Course (formative aims, fees, mode and time of application, application forms...) are available at:
